

# EDIT DECISION LIST – RECORDER

for Media Composer® Premiere® FCP®  
tailor made for every configuration and requirement

**EDL-REC blk**

**EDL-REC pro**

**EDL-REC 19"**

The EDL-RECs recording live cuts & transitions from the vision mixer and creating ready-made Edit Decision Lists in multicamera-mode for all common non-linear editing systems.

This enables faster, superior and more efficient post-production.

Up to 50 % editing time in the post-processing and accordingly budget can be saved.

Usage: Multicamera Recordings & Live-Broadcasts with Post-production

Formats: Talk, Quiz, Show, Concert, Theatre, Opera, Musical, Event

Users: TV, Entertainment, Business, Culture, Industry

Place live markers with up to 5 hand-held marker-keypads into the timeline

**For:** Executive Producers, Producers, Directors, Editors, Editorial Staff, Authors, Scripter, Assistants

**What:** Highlights, Shortenings, Corrections, Audio-/Video Adjustments, Starts, Ends, Parts

increases **quality** - reduces **costs**.

## Post-production by comparison

### without EDL

- one continuous programme-recording + sources
- programme INs & OUTs have to be searched & marked time consuming
- sources In & length has to be searched & marked
- the source will be patched over programme
- this procedure repeats until end of work

### with EDL-REC Edit Decision List

- all sources + PGM
- all in sync
- all cuts and transitions from the recording
- simply switch sources
- simply trim sources direct

Pre-/Offset = ALWAYS everything IN SYNC!

Wireless cameras, vision mixers, DVEs, several timecode generators, synchronizers, ...

only a few examples why multicamera-projects are not always automatic in sync.

While generating the EDLs in the EDL-REC every source can get a individual pre- or offset in frames.

### RAW FOOTAGE

:20 CAM1	:23 CAM2
:00 CAM3	:01 PGM

### EDL-REC

Source	Pre-/Offset
Cam1	+5 Frames
Cam2	+2 Frames
Cam3	0 Frames
PGM	-1 Frames

### EDL

:00 CAM1	:00 CAM2
:00 CAM3	:00 PGM
